CDI TORQUE PRODUCTS DIGITAL TORQUE TESTER™ (DTT)

Test the health of your torque wrenches anywhere with the digital torque tester.

Utilizing the testing protocol and standards developed by the American Society of Mechanical Engineers (ASME) The Digital Torque Tester™ (DTT) is designed to be an affordable torque tester that can be mounted on a wall or used in a bench-top vise to allow the operator to conveniently test torque wrenches and torque screwdrivers. It features an easy to use touch pad screen to capture peak torque values during a test in real time, and download stored torque data to a PC. All DTT torque testers are sold in a kit with the tester, carrying case and AC/DC power supply.

CDI TORQUE PRODUCTS TORKY - SINGLE SETTING WRENCHES

CDI's TORKY is a right angle pre-set torque wrench. Torky is designed for production torque applications that require higher values than a torque screwdriver can deliver. The comfortable design eases the strain of repeated uses. Torque value may be ordered factory pre-set at an additional charge or it may be easily set by the operator with any quality torque calibration system. When the proper torque value is reached, a momentary release or "break" can be felt. Available in three drive styles to fit most needs.

Features

- Factory Pre-Set models are set at the factory to the customer's specified torque setting and are furnished with a Certificate of Calibration
- Please specify desired torque setting when order is placed
- Three models available
- Simple, easy to use design
- Ruggedly built for years of reliable service
- Operates bi-directionally
- Accuracy: ± 6% of indicated value, CW, from 20% to 100% of full scale

Prevents premature wear of carbide inserts and damage to cutter head due to improper clamp load.

CDI TORQUE PRODUCTS TORQUE SCREWDRIVERS - MICRO-ADJUSTABLE

Adjustable models offer versatility for applications that require more than one torque value. These torque screwdrivers are particularly suited for the electronics industry and for instrument assembly work. A simple, cam-over design prevents over-tightening and possible damage to components. Torque settings are easily and accurately changed with a unique adjusting knob and easy-to-read window scale. Adjusting the screwdriver is simple. Just pull out the adjusting knob to unlock, turn to the desired setting, then push the knob in until it clicks!

NON-SPARKING TOOLS

BAHCO non-sparking tools are designed for use in potentially explosive environments where traditional steel tools may create a spark. Safety is paramount and non-sparking tools are essential to uncompromising safety.

DID YOU KNOW?

OSHA (Occupational Safety and Health Administration) has developed best practice guidelines for certain chemicals and processes which include the use of non-sparking tools. BAHCO Non-Sparking tools meet these guidelines.

In addition to below, a selection of Non-Sparking Wrenches, Screwdrivers, Pliers, Hammers, Hex Keys, Wedges, Prybars, Chisels and more can be found in CAT4.

Contact your Snap-on Industrial Brands Representative for details.

To Calculate your cost on bands not shown

Welded to length cost calculation:

1. Band Length x Price Per Foot = Material Cost
2. Material Cost + Weld Charge = Band Cost

Weld Charges	List Price:	Sale Price:
1/2" to 3/4"	\$15.46	\$12.15
1"	\$18.27	\$14.36
1-1/4"	\$20.37	\$16.01
1-1/2"	\$22.31	\$17.53
2"	\$26.39	\$20.74

Bands slightly over a foot in length are figured at the next half foot increment.

Bands slightly over half foot in length are figured at next full foot increment.

Example: 5'4-1/2" band figures as a 5'6" band

7'9-1/2" band figures as a 8'0" band
