GS160G 6" PRECISION MILLING VISE 327-320

\$695

This vise has been redesigned with new industry leading work holding features.

- Larger, more durable **bearing pack** engineered to deliver a highly stable workholding system that is strong under pressure.
- A new brush seal design **keeps debris from penetrating the nut** due to a more efficient **chip evacuation system** through both the body and ends of the vise, while not compromising on the strength of the body.
- Spherical Segment creates an **all directional alignment** and **reduces jaw lift** of the movable jaw, while the 4-bolt design of the fixed jaw enable **stable clamping**.
- **Reduced stress on body** as a result of the pull-type design feature also includes a **spindle nut that does not protrude** past the end of the body during clamping.
